## A small indication of the areas of our expertise.

For two decades, CLSI has led the world. Today, state-of-the-art Libs 100 library systems operate in more than 2000 libraries around the globe.

CLSI designed a Libs 100 system to operate 498 terminals in the New York Public Library, the world's largest. In China, the National Library's Libs 100 runs a sophisticated dual character system. In Europe, the Helsinki Metropolitan Library Network and the Paris City Network are planned to come on-line with Libs 100.

Upgrades to the Libs 100 system in the Melbourne University will make it Australia's most powerful academic library computer.

Your library can benefit from CLSI's experience (and the US\$3 million spent annually on research) no matter what its size.

Talk to CLSI. You'll find there's a world of difference.
